## OUR MISSION

Our strong commitment is to provide high quality of services thus, we are ready to enter into long-term relationships with our clients. For this reason it is imperative that we develop our technological processes and keep them under constant supervision. It is important that our employees are qualified. The key to success in our company is teamwork. We are able to solve various problems quickly and professionally by combining knowledge and experience of our associates.

Our goal is to have the whole process of production in our workshops, and to this day we have realized it almost completely. Apart from development of the existing possibilities, from time to time, we put into operation new equipment in order to satisfy broad claims of our clients.

We are always open to challenges and we solve new tasks to the best of our knowledge. We have been working for more than two decades and professional experience gained during that time guarantees the quality of our products and services.

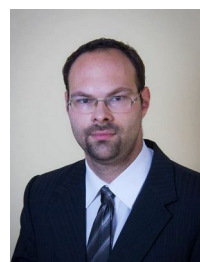

We are proud that our activity keeps industry moving in the way we provide parts for repair of old machines or building of new ones. Throughout the history of our company we made and we are still making parts for machine tools, equipment for brick plants, machines for construction industry (excavators, loaders, cranes, etc.), mining equipment, various vehicles (cars, trucks, motorcycles, bicycles, boats), machines for recycling of waste, heating plants, printing machines, processing and packaging in food industry and, as the last but not the least important, parts for agricultural machinery.

We expect our fellow employees to always have in mind interests of the company and the clients. In return, we are trying to create appropriate working conditions for them and provide competitive salary and respect.
